

Shutters

STANDARD STYLE

The best fit and value in shutters for your home

- Two styles in standard and special sizes. Builders Edge® Shutters are available in Louvered and Raised Panel styles. Louvered is available in 14 lengths, Raised Panel is available in 13 lengths and both are available in 12" and 15" widths.
- Durable, maintenance-free U.V. stabilized, deep wood grain texture.
- All shutters are constructed with color molded-through so they won't scratch, flake, or fade.
- 40 year transferable warranty.

In two standard widths—12" and 15"

Available in 16 maintenance-free accent colors, plus Paintable.

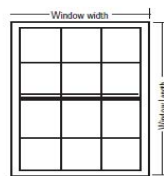

Actual colors may differ slightly from printed representations.

030 PAINTABLE
 Available for you to paint with your custom color. Paintable is perfect for painting shutters to match other areas of your home, and they won't warp or split like wood shutters.

How to Measure

- 1 Measure the width and length of each window (include the frame of the window in your measurements).
- 2 Review your window widths. If they measure between 26"-45", use the standard 15" wide shutter. For windows that measure between 18"-32" the standard 12" wide shutter is recommended. Any window width wider or narrower may require a custom size.
- 3 Choose the 12" and 15" wide shutter lengths that most closely match your window lengths.
- 4 If necessary, use the custom size chart to choose your custom size shutters.
